

Electrical Point Specification for Swimming Pool Installation

Each school is responsible for ensuring the electrical work is installed by a qualified electrician prior to set up, and that the work is certified.

Each school requires:

- C Type Mini Circuit Breaker at the mains supply.
- 5-PIN Neutral 3 Phase 64-amp IP64 socket with a rotary isolator and housing an internal 40amp RCBO.
(3 Phase 380-400V supply must be available)
- Lockable IP-RATED 240-volt outdoor socket for 13amp appliances. Ideally 2 sockets.
- These should be within a 3-metre distance of the agreed pool location.
